

To FCC,

I am in complete support of the NAB petition. XM and Sirius satellite radio have broken their promise, launching "localized traffic and weather service in the top twenty-one markets. Without FCC intervention, two companies, with 120 channels each, will reach into every market and try to mimic what local broadcasters do. Satellite Radio doesn't have public interest limits or ownership limits. They have no local investment in these communities. Our Radio Station has programs such as Soft Rock 98.9 Roll Call with Brady and Rose to encourage attendance with our local school district. Our station has worked with our local Marines collecting Toys for Tots. These are just a few of our efforts that demonstrate our commitment to our local community. I sincerely request that the FCC oppose the efforts of satellite radio to broadcast local traffic and weather.

Most Sincerely,

Janeen Lawson
